

-ABOUT-

My name is Cody and I am currently a front end developer on a path to increasing my knowledge base.. I attend Lambda School's full-time Web track, where I've completed the three month Front-End modules which include HTML, CSS, JavaScript and React.js.

Presently I am in the Back-End module and focusing on Node.js & SQL thus far, with future modules on Data Science and Labs. A list of my repositories can be found at: [cmruss \(CM Russell\)](#). My organization links are all projects starting from scratch that required extensive team collaboration.

-STRENGTHS-

Though my professional career I have developed strong communication and problem-solving skills, a cool head under pressure and in tense situations, organizational and logistic capabilities, a solid sense of collaborative and cooperative readiness, an inquisitive and receptive mindset, and a focused and efficient pace.

Learning is a lifelong passion, and ultimately the path I'm looking for in my career. Familiar with long hours and tight deadlines, not afraid of either.

-WORK EXPERIENCE-

Roush Industries - Allen Park, Livonia — *Instrumentation Technician* 2018-2019

Material & instrumentation technician in the prototyping field. Responsible for tracking and delivering prototype parts on the build floor, and assembly of prototype electronic modules for the end user.

Collaborated with every department of Prototyping at Buildings 9, 13, 50, & 82 to ensure all materials were delivered or installed in as expeditious a manner as possible without sacrificing accuracy using various forms of proprietary tracking software.

Worked on distribution during build, and redistribution post-build, including to outside organizations.

Prototype electrical harness build experience includes wire diagram reading & comprehension, crimp and solder best applied practices, wire routing & installation, as well as quality control & testing.

Patrick F Lyons O.D., Manzo Eye Care - Royal Oak — *Optician, Technician* 2008-2017

Dispensing optician with nine years experience. A diverse range of skills and responsibilities in the field, including accounting, retail sales, management, billing, reception, and ophthalmic technology.

Experienced in medical technical skills, medical duties and the use of specialized medical equipment; medical device adjustments, measurements, and fitting.

Acting as manager; employee scheduling, handling high call volume, ordering and stocking, employee training, resolving customer dissatisfaction, and dealing with emergency situations.

-EDUCATION-

Lambda School
